

## PNZ National Executive Elections 2023

### Vote for Kirsten Davie - President & Dr Jon Warren - National Executive

This is a critical time for our profession due to the immense pressure on the healthcare system and growing equity concerns. Physiotherapy must strategically communicate its key messages and collaborate across both the private and public sectors. Advocacy is vital at all levels.

Kirsten and Jon have extensive experience in physiotherapy and are strong advocates for the profession. They have been actively involved with PNZ throughout their professional life at regional, national and international levels, including both having served terms as PNZ president. They also represented PNZ in the Ministerial Review on funding, essential for equity and retention.

Private physiotherapy practices are under considerable strain, with the remuneration packages of many health providers gaining significant increases over the last few months. Kirsten and Jon are aware that similar salary levels cannot be achieved in private practice due to the flawed funding model that ACC has adopted. These concerns were raised at last year's PNZ AGM by a number of past presidents. Gaining positive advances on this key issue is vital for the sustainability of physiotherapy businesses.

PNZ's policies must align with the evolving healthcare landscape. Championing diversity, inclusion, and addressing healthcare disparities is essential for an equitable healthcare system.

Jon and Kirsten value your input and are supported by many respected leaders in the profession including Gill Stotter, Margot Skinner, Duncan Reid, Lee Gardiner, Dusty Quinn, Michael Monaghan and Angela Cadogan. Let us advance physiotherapy together.
